

Elementary Scholastic Reading Inventory

The Scholastic Reading Inventory tests students' reading levels or lexiles. Each graph tracks the same group of students for five years with the exception of the first four graphs, since this testing begins at 2nd grade. Teachers use this information to determine what grade level students are reading at, and gives special education personnel support data when referring/testing for special education. These graphs show that there is a significant increase in the students scoring in the advanced/proficient quartiles over the five years of data.

3rd Grade SRI

4th Grade SRI
