These charts of the TerraNova National Percentile of the Mean NCE make it possible to track each CCPS class in Reading from year to year. In the charts, each color represents a class. In the 2007-2008 school year, CCPS started testing with the TerraNova, 3rd Edition (instead of the TerraNova 2nd Edition). CCPS started testing the students in grades 3-11 in the Fall during the 2009-2010 school year, instead of the Spring. This seems to have eased the amount of tests the students are given in the Spring.
